**ARTICLE TYPE:** Review paper

### ABSTRACT

*The economic indicators which are considered the mirrors of the scenario of an economy display the true picture of the development of a country. Foreign Direct Investment (FDI) can be one of the economic indicators that can demonstrate a Bangladesh's development framework. The objective of the study is to focus the current position of FDI in Bangladesh along with its problems and remedies. The study identifies that the contribution of FDI of developed and developing countries in Bangladesh is not to that level as it is expected. And this is due to some uncertainties like uneven ratio in savings and investments, unsatisfactory GDP, the trade deficit, political instability, poor law and order situation, etc. Yet, investment incentives and regulations of Bangladesh for FDI have been found competitive with those offered by some other countries. To develop the scenario of FDI in Bangladesh, some recommendations have been put forward in this study.*

**KEYWORDS:** FDI, Issues, Challenges, Economic indicators, Bangladesh.
