ABSTRACT

The present study aimed to analyse the inter-generational relationship among aged-pensioners of Bhubaneswar, Odisha. Hence, the study has collected data from the population of aged pensioners of Bhubaneswar, Odisha under the age group of 58 years and above who were selected by stratified purposive sampling design and snowball technique sampling method where the lists of pensioners are collected from the District Treasury Office and Nationalised Banks. Since the objective is to identify the aged pensioners based on the background of socio-economic support of aged pensioners of Bhubaneswar, the snowball technique was justified. Hence, the study used the sample size of 150 aged-pensioners of Bhubaneswar. Statistical analysis of their demographics and relationship structures are analysed, and the results displayed that the majority of the aged pensioners who prefer to live with their family and showed active support for their families. Aged pensioners are getting different support from youngsters. However, the income of aged pensioner's son does not support their health condition. Hence, they prefer pension scheme for their medical assistance. It is concluded that the inter-relationship of aged pensioners with their co-residence son in Odisha is superior.
